

# Water Quality

Clean water is critical to life and a safe and healthy society. Best Best & Krieger LLP (BBK) attorneys have been advising clients on water quality issues, litigating when necessary, since before the Clean Water Act's adoption in 1972. We offer our clients a seamless combination of regulatory, legal and technical water quality advocacy services to address new, novel or particularly complex water quality issues.

Representation of seminal cases and projects that shape the future of the water quality landscape

## Recognized Authorities

BBK Water Quality attorneys are recognized authorities on questions arising under the Clean Water Act and the Safe Drinking Water Act, and their state law equivalents, as well as the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA), and Resource Conservation and Recovery Act (RCRA). We are sought after for our skills in specific water quality focus areas, such

as wastewater, stormwater, recycled water, municipal, construction and industrial stormwater permitting, operation and maintenance of water treatment and reclamation facilities, citizen suits and administrative enforcement, as well as small and large transportation and water infrastructure projects.

## Unparalleled Advocates

At BBK, our water quality attorneys work on seminal cases and projects that shape the future of the water quality landscape. Our deep knowledge of water quality laws and active engagement in emerging issues also enables us to offer clients unrivaled water quality representation on day-to-day issues such as negotiating regulatory permits, establishing compliance programs, responding to audits and enforcement actions, and participating in rulemaking and other administrative proceedings.

As a recognized authority on water law with decades of experience, we have developed effective working relationships with the federal and state regulators and the nongovernmental entities that closely monitor water quality issues, and we have earned their respect. Our attorneys bring a wealth of experience and influence to help our clients achieve their water quality goals.
